Jordan High School: Violent Crime Hot Spots

776 violent crimes were reported within the Jordan High School attendance boundaries.

The Jordan HS area had a rate of 139.2 violent crimes per 10,000 residents compared to a rate of 40.5 for Los Angeles overall.*

Students living in Nickerson Gardens may likely walk to school along Compton or Wilmington Aves and 103rd St which are violent crime hot spots.**

About the map:
Violent crimes include homicide, aggravated assault and robbery.

Both Los Angeles Police Dept. (LAPD) and Los Angeles County Sheriff’s Dept. (LASD) data were used to create this map because the Jordan HS attendance boundaries contain areas where LAPD and LASD respond to crimes.

The most recent crime data available for both sources was used (LAPD 2011, LASD 2010).

*Rate is for Los Angeles overall calculated using all violent crimes reported to LAPD in 2011 and the 2010 population of Los Angeles. **See Appendix for more on the methodology used.

Prevention
Los Angeles HEAL.U Network

• Encourage investments of public dollars in land use policies and projects in high-need communities.

• Increase capacity for robust public engagement in land use planning, policy, and implementation.

• Accelerate land use innovations and demonstration projects in low-income communities.

• Foster inter-departmental collaboration to embed health and equity in all land use decisions.
