The 2018 Conference Program

NEW for 2018, the New Partners for Smart Growth™ Conference program will feature eight thematic tracks — each focusing on a set of topics strongly connected to timely community issues and challenges, with smart growth and equity as the threads woven between and throughout each track.

The 2018 program will allow participants to go deeper into a topic, while continuing to connect back to broader placemaking efforts with a multidisciplinary group of partners tackling community challenges. Each track will provide participants the opportunity to move through a series of connected sessions with a multidisciplinary peer cohort of practitioners that all leave with an implementation strategy, new tools, models and templates to integrate into their work.

Participants, as always, will be able to attend sessions across tracks – picking and choosing which topics and sessions will provide them the most value – based on their subject interests, experience level or what they want to take away from the conference to apply in their communities back home. Coordinated keynotes and networking activities will also be included throughout the program to ensure that participants are learning and networking with a broad, multidisciplinary national audience.

Eight Thematic Tracks

- Building Capacity in Small Towns and Rural Communities
- Improving Transportation Accessibility and Connectivity
- Adapting to a Changing Climate
- Creating Housing for Everyone
- Designing Healthy Communities
- Inclusive Prosperity of People and Place
- Planning and Designing Smart-Growth Communities
- "One Water" for Resilient Communities

Sessions within each track are organized by session type. Each track will include:
